Education

•National Institute of Technology, Surat *2024 – Present*

B.Tech in Artificial Intelligence; CGPA: 7.98 (Current, 4th sem) Surat, India

– **Relevant Coursework**: Machine Learning, Deep Learning, Data Structures, Algorithms, Linear Algebra, Probability & Statistics, Operating Systems, DBMS.

Technical Skills

Machine Learning & AI: PyTorch, TensorFlow, Scikit-Learn, XGBoost, LangChain, RAG, Transformers (BERT/ViT), LLMs, Computer Vision, MLOps, MCP
Languages: Python, C/C++, SQL, R, MATLAB, Bash/Shell, JavaScript, TypeScript
Web Deployment: FastAPI, Next.js, Docker, Kubernetes, AWS (SageMaker, EC2), Google Cloud, REST APIs, gRPC
Tools & Libraries: Git, OpenCV, Pandas, NumPy, HuggingFace, Postman, LaTeX

Research Experience

•Hybrid Ensemble for Astrophysical Document Classification *Sept 2025 - Oct 2025*

TRACS @ WASP 2025 (Shared Task) | Team: Clutch or Cry **Accepted Paper** | Kaggle Rank: 4th

– **Tech Stack**: Python, PyTorch, astroBERT, XGBoost, Scikit-learn, Pandas, NumPy.
– **Developed** a hybrid ensemble model for multi-label text classification, achieving **4th place** on Kaggle leaderboard.
– **Synthesized** semantic embeddings from domain-adapted astroBERT with rule-based heuristics to maximize F1-score.
– **Published** research on mitigating class imbalance in astrophysical datasets via XGBoost meta-learners at WASP 2025.

Machine Learning Projects

•Project Veritas (Multi-Modal Misinformation Detection) *Feb 2026*

National Winner, Echelon 2026 (1st Place) **Live Website** | Github

– **Tech Stack**: Python, PyTorch, Transformers, FastAPI, Next.js, Chrome Extension.
– **Developed** a prize-winning multi-modal system to verify claims by analyzing consistency between text and image pairings.
– **Engineered** an explainability engine using LLMs to generate natural language reasons for credibility verdicts (True/Fake).
– **Built** a real-time detection pipeline and integrated it into a Chrome Extension for instant social media verification.

•HFT Market Analysis & Trading Platform *Dec 2025 - Jan 2026*

Winner, Genesis 2026 | *Surveillance & Pattern Discovery* Live Website | Github

– **Tech Stack**: Python, C++, DeepLOB CNN, gRPC, TimescaleDB, Docker, AWS.
– **Built** an ultra-low latency HFT platform processing 160+ snapshots/sec with a DeepLOB CNN model for price prediction.
– **Deployed** real-time inference microservices achieving 63.4% directional accuracy and <10ms end-to-end latency.
– **Implemented** automated market manipulation detection (spoofing/layering) on high-frequency time-series data.

•CryptoIntel-MCP (Market Intelligence Server) *Jan 2026 - Present*

Autonomous AI Agent Integration Github

– **Tech Stack**: Python, Model Context Protocol (MCP), LLMs, REST APIs.
– **Engineered** Model Context Protocol (MCP) server enabling LLMs to securely query real-time cryptocurrency market data.
– **Integrated** live financial APIs to provide autonomous AI agents with actionable intelligence on order books and pricing.

•Trendora (AI-Powered Fashion Marketplace) *July 2025 - Aug 2025*

Winner, Web Wonders 2025 (1st Rank) Live Website | Github

– **Tech Stack**: Next.js, GenAI (Gemini), Leffa ML (Virtual Try-On), LangChain, Firebase.
– **Integrated** state-of-the-art Computer Vision models (Leffa ML) for Virtual Try-On functionality in a React application.
– **Developed** 'Zyra', an AI stylist chatbot providing personalized fashion recommendations using RAG and LLMs.

Achievements

•1st Place Winner, Echelon 2026: Won 1st prize in National Level 24hr AI x Cybersecurity hackathon.

•1st Place Winner, Genesis 2026: Secured top rank in AI/ML + Web dev competition.

•1st Place Winner, Web Wonders 2025: Secured top rank in Full-stack Web dev competition for 'Trendora'.

•Kaggle Rank 4, WASP 2025: Achieved 4th place on Kaggle leaderboard for TRACS Shared Task.

•Finalist, ACM Summer Challenge 2025: Qualified as finalist in competitive programming contest (Top 2%).

Positions of Responsibility

•Google Developer Group (GDG): Junior Developer, selected for technical expertise (Oct 2025 – Present).

•ACM Student Chapter: Executive Member, organizing technical workshops (Sept 2025 – Present).

•Mindbend: Co-Head, Specialized in Sponsorship and Outreach (Nov 2025 – Present).
